Regulation (EC) No. 1907/2006 Duty to communicate information according to Article 33

Regarding Article 33(2) we can confirm that our products do not contain any substances of very high concern (SVHC) included in the list, in proportions that are greater than 0.1%. We have ensured that any new substances which are added when the list is updated will be checked against the materials we use, to meet our duty to communicate information, should this be required.

In the unlikely case that the status of a material changes within regard to the SVHC candidate list, we will notify all our customers who have purchased the material in the previous 12 months of the change in the products status without any special request.

It will, therefore, not be necessary to contact us if there are any changes to the SVHC candidate list. We will notify you if one of the products you purchase from us should be affected.

If you require any further information or have any questions, please contact our REACH representative.

His contact details are:

Tel.: +49 8233 846-0

Fax: +49 8233 846-210
